

Citrix® Solution

Remote Office Connectivity

Solution Components

Citrix® MetaFrame® Presentation Server extends the reach of Windows®, UNIX® and Java™ applications on any device over any connection, to local, remote and mobile workers.

- Automate application packaging and delivery
- User collaboration
- Universal client access
- Bandwidth optimization
- Standards-based SSL

Citrix MetaFrame Secure Access Manager extends access beyond applications to internal documents, web content, and services – delivered securely and tailored to each user's needs.

- Personalized role-based access
- Fully secure Internet access
- Easy to administer

Citrix Consulting Services provide expert support to assure seamless and rapid integration of Citrix Solutions into your infrastructure.

Geographically dispersed offices need fast, reliable and secure access to business-critical applications and information – at any time, from anywhere.

The Citrix® Solution for Remote Office Connectivity is a proven solution that enables you to provide remote offices with no-compromise secure access to any application. Provisioning that once took weeks can now be completed in minutes. With one solution, you improve productivity, reduce operating costs and increase security.

Gaining competitive advantage with Citrix Solutions

- A management consulting firm rapidly provisions and integrates new overseas offices over the Internet, instead of individually on site
- A healthcare facility provides local physicians with secure access to medical information, relying on the Citrix solution's advanced 128-bit encryption and two-way mutual authentication to safely use the public Internet as a virtual private network
- An insurance carrier delivers applications to agents across the U.S. – in company branches, independent brokerages and even home-based offices with only dial-up connections
- An oil and gas producer saves over 10 percent of its IT budget in the first year through reduced travel, staff hours and hardware costs

"The ease of application deployment to an acquisition partner is phenomenal with the Citrix solution. We can now seamlessly incorporate newly acquired companies into the business, providing universal application access with a minimum of fuss and expense."

Brian Finley, Chief Technology Officer
PSS World Medical

► Citrix Solution for Remote Office Connectivity

No-compromise business access

The Citrix Solution for Remote Office Connectivity provides a scalable server-based architecture that provides workers in remote locations with seamless, reliable and secure access to full-featured enterprise applications. Wherever they are, users experience the full performance and functionality of enterprise applications even over low-bandwidth connections. By enabling real-time access to corporate and customer information, the Citrix solution helps employees provide better service and increase customer loyalty.

Instant-on for immediate time and cost savings

The Citrix solution reduces the time and cost of provisioning remote offices by allowing you to configure, manage and enable secure application access from one centralized location. This instant-on capability increases business agility by speeding the integration of new offices and reducing the time-to-market for new services. Eliminating the need to dispatch IT staff to service remote locations leaves you with time to concentrate on more important things – like doing business.

Plus, reduced support costs and improved IT staff productivity contribute to a lower total cost of technology ownership — as do your savings on PC upgrades, telecommunications charges and employee training. And by extending the life of existing applications and hardware, Citrix Solution for Remote Office Connectivity increases your return on technology investment.

Real companies, real results

- Following the acquisition of 100 sites in a merger with another large waste management firm, Casella Waste Systems used the Citrix solution to integrate the business processes of 950 users in 120 locations. Centralized deployment of Lotus Notes-based business applications, Lotus Domino, J.D. Edwards® OneWorld® and Microsoft® Office, reduced IT administration and hardware costs by 50 percent.
- Prudential Fox & Roach Realtors rely on the Citrix solution to provide 3,800 users in 82 locations access to the Multiple Listing Service, Microsoft Office and personal productivity tools. Working at home or on the road, agents simply dial in, access a secured corporate intranet site and receive Web-based access to full-function Windows applications.
- AutoGlass Specialists of Madison, Wisconsin, reduced its network infrastructure costs by \$270,000 and IT administration costs by \$245,000 after implementing Citrix software to deploy more than 55 point-of-service, timekeeping, inventory management and industry-specific applications to 350 users in 74 locations throughout eight Midwestern states.
